

FORKLIFT SAFETY INSPECTION CHECKLIST

PRE-OPERATION INSPECTION

- TIRES**
Look for wear, damage, or low pressure (if pneumatic)
- FORKS & MAST**
Check for cracks, bends, or misalignment
- LIGHTS & ACCESSORIES**
Ensure they function properly for visibility and communication
- CHAINS & HYDRAULICS**
Inspect for proper tension and leaks
- SEATBELT & SAFETY GUARDS**
Confirm they are intact and operational
- BATTERY & FUEL SYSTEMS**
Look for corrosion, leaks, or low levels (use proper PPE)
- OVERHEAD GUARD**
Make sure it's secure and free of damage

NATIONAL LIFT TRUCK

**REPORT ALL UNUSUAL
OPERATIONAL NOISES
& LEAKS IMMEDIATELY!**

OPERATION CHECK

- SEATBELT & PARKING BRAKE**
Ensure the seat belt is secure and the parking brake engages properly.
- INSTRUMENT PANEL & WARNING LIGHTS**
Turn the key to the "ON" position and verify that all warning lights illuminate.
- HORN & BACKUP ALARM**
Press the horn and listen for the backup alarm when shifting into reverse.
- OPERATING LIGHTS & TURN SIGNALS**
Test headlights, brake lights, and turn signals for proper function.
- ENGINE START & IDLE**
Start the engine and listen for unusual noises or vibrations.
- STEERING & BRAKES**
Check responsiveness by turning the wheel and pressing the brake pedal.
- MAST & TILT CONTROLS**
Operate the lift and tilt functions to ensure smooth movement.
